Microbiology (with a year in industry)

University of Dundee

Venues

City Campus

Content

The Microbiology degree programme at Dundee deals with aspects of the subject ranging from those of medical importance (such as infectious diseases and immunology) to those of environmental and biotechnological importance (such as control of pollution and bioremediation).

Major areas of microbiological research include aspects of fundamental and applied microbiology, ranging from mechanisms by which microbial pathogens and their hosts interact to environmental decontamination, and involve molecular, cellular and environmental studies using model organisms as well as those of health and economic significance.

This course also allows you to spend a year working in industry, for example, in a commercial laboratory. This allows you to gain real-world skills and improve your CV. It also presents you with the opportunity to network and build relationships. These are all things that could have a positive impact on your career upon graduating from university.

Start Date

September

Qualification

Degree

Study Method

Full time

Award Title

BSc Hons

UCAS Code

C502

Course Length

5 years

Faculty

School of Science & Engineering

Department

Biological Sciences and Biomedical Sciences

Entry Requirements

2027 entry requirements:
4 Highers at BBCC (BCCC for widening access entry) including Biology or Chemistry plus National 5 Maths, Biology and Chemistry.

SCQF Level

10
