

## Microbiology (with a year in industry)

University of Dundee

### Venues

City Campus

### Content

The Microbiology degree programme at Dundee deals with aspects of the subject ranging from those of medical importance (such as infectious diseases and immunology) to those of environmental and biotechnological importance (such as control of pollution and bioremediation).

Major areas of microbiological research include aspects of fundamental and applied microbiology, ranging from mechanisms by which microbial pathogens and their hosts interact to environmental decontamination, and involve molecular, cellular and environmental studies using model organisms as well as those of health and economic significance.

This course also allows you to spend a year working in industry, for example, in a commercial laboratory. This allows you to gain real-world skills and improve your CV. It also presents you with the opportunity to network and build relationships. These are all things that could have a positive impact on your career upon graduating from university.

### Start Date

September

### Qualification

Degree

### Study Method

Full time

### Award Title

BSc Hons

### UCAS Code

C502

### Course Length

5 years

### Faculty

School of Science & Engineering

## Department

Biological Sciences and Biomedical Sciences

## Entry Requirements

2025 entry requirements:

4 Highers at BBBB (BBCC for widening access entry) including Biology and Chemistry plus Maths at National 5 at B.

Advanced entry to 2nd year available with Advanced Higher Biology and Chemistry at AB or BA plus Highers at BB plus Maths at National 5 at B.

## SCQF Level

10
