

Molecular Biology (with a year in industry)

University of Dundee

Venues

City Campus

Content

Molecular Biology involves the study of the functions of the cell's macromolecules.

The University of Dundee is recognised internationally as one of the leading centres for biochemical research, including areas such as cell signalling, cell and developmental biology, cell division, diabetes and cancer research. Our teaching is research-led, meaning that the degree programmes benefit from association with research of international standard and its commercial and biomedical applications, and from the active participation of many leading scientists in the field.

This course also allows you to spend a year working in industry, for example, in a commercial laboratory. This allows you to gain real-world skills and improve your CV. It also presents you with the opportunity to network and build relationships. These are all things that could have a positive impact on your career upon graduating from university.

Start Date

September

Qualification

Degree

Study Method

Full time

Award Title

BSc Hons

UCAS Code

C721

Course Length

5 years

Faculty

School of Science & Engineering

Department

Biological Sciences and Biomedical Sciences

Entry Requirements

2025 entry requirements:

4 Highers at BBBB (BBCC for widening access entry) including Biology and Chemistry plus Maths at National 5 at B.

Advanced entry to 2nd year available with Advanced Higher Biology and Chemistry at AB or BA plus Highers at BB plus Maths at National 5 at B.

SCQF Level

10
