Computer Science (Data Science and AI) with Industrial Placement

University of Dundee

Venues

City Campus

Content

Are you passionate about exploring the potential of data science and artificial intelligence to change the world?

This degree focusing on Data Science and AI is designed to equip you with the knowledge and skills needed for a career that specialises in these rapidly growing fields. You will learn about topics such as machine learning, statistical modelling, data visualization, and natural language processing, among others, to create intelligent systems and applications that can process and analyse large volumes of data.

Throughout your studies, you will work on projects that reflect real-world challenges faced by data science and AI professionals. You will have the opportunity to collaborate with industry professionals, gaining insights into the latest trends and techniques in these fields.

As part of your degree program, you will have the opportunity to participate in an industrial placement that will occur prior to your final year of study. This placement will provide you with a unique chance to develop your career aspirations and gain first-hand experience working in the computing industry.

Start Date

September

Qualification

Degree

Study Method

Full time

Award Title

BSc Hons

UCAS Code

I401

Course Length

4 years

Faculty

School of Science & Engineering

Department

Computing

Entry Requirements

2027 entry requirements:
4 Highers at BBBC (BBCC for widening access entry) including Maths.

SCQF Level

10

Progression Routes
