

# Computer Science (User Experience and Design) with Industrial Placement

University of Dundee

## Venues

City Campus

## Content

Are you passionate about designing user experiences that are intuitive, engaging, and meaningful?

Our User Experience and Design degree is specifically designed to equip you with the skills and knowledge needed for a Computing career that specialises in UX design. You will learn about user research, information architecture, interaction design, and visual design, among other topics, to create engaging and effective user experiences.

Throughout your studies, you will work on projects that reflect real-world challenges faced by computing professionals. You will also have the opportunity to collaborate with industry professionals, gaining insights into the latest trends and techniques in UX design.

As part of your degree program, you will have the opportunity to participate in an industrial placement that will occur prior to your final year of study. This placement will provide you with a unique chance to develop your career aspirations and gain first-hand experience working in the computing industry.
