Content

Economics is a diverse subject to study, as it can touch upon areas of finance, politics, business, history, and other social sciences. In many ways, it can cover every aspect of the way we live our lives.

This programme provides students with a detailed knowledge of Economics, and skills to be able to apply the knowledge in a practical sense. It covers both microeconomic (the actions/behaviours of an individual "unit", such as an individual company, household etc) and macroeconomic issues (a much wider view of economic actions/behaviours, for example Governments).
