Civil Engineering

University of the West of Scotland

Venues

Paisley Campus

Content

The BEng Civil Engineering course covers broad-based civil engineering subjects to equip you with knowledge and skills to plan, design and implement major civil engineering projects.

There is a 36-week period of paid industrial training incorporated into this degree, which is obtained competitively. If you are successful in completing this period of employment, you will graduate with a 'Sandwich' degree which demonstrates to employers that you are ready to make an immediate contribution to their teams. This thin sandwich placement is undertaken out-with term time/on a part-time basis meaning it does not affect the duration of the degree. The practical nature of the civil engineering course also means that you will visit construction sites and spend time at the National Construction College as part of the degree.

Start Date

September

Qualification

Degree

Study Method

Part time (day)

Award Title

BEng Hons

UCAS Code

H200

Course Length

4 years

Faculty

School of Computing, Engineering and Physical Sciences

Department

Engineering

Entry Requirements

2026 entry requirements

Standard entry:
4 Highers at BCCC including Maths plus Physics at National 5 at B.

Entry to year 2 is possible with 3 Advanced Highers at CCD including Maths and Physics.

Widening access entry:
3 Highers at BCCC including Maths plus National 5 Physics at B.

SCQF Level

10

SCQF Points

«SCQFPoints»

Progression Routes

Careers as a civil engineer are varied, ranging from design and construction in private industry to employment with national industries or with local, regional or central government.
