Engineering Skills (Level 5)

Edinburgh College

Venues

Midlothian Campus

Content

You will learn basic engineering processes and maintenance by working on a range of engineering systems such as fitting using hand skills; fabrication; manufacturing; project design and much more.

This course supports progression into other engineering studies which can lead to a university degree, training or employment. You will be provided with information to give you an insight into engineering occupations such as mechanical, fabrication, automotive, aeronautical, electrical and electronic, marine and control. Once you have completed this course, you can use your studies to help you choose which career path within the engineering industry you wish to pursue.
