Business Management

South Lanarkshire College

Content

This course reflects the changes needed to accommodate the rapidly changing technological developments that have disrupted the internal and external business environments, and the increasing drive for businesses to use digital online models and app technology.

You will be introduced to the various disciplines needed to provide a more holistic understanding of running and managing a business.

Content includes:

business fundamentals including Big Data and emerging technologies; cyber security; digital skills; economics; marketing; accounting; communication; managing people and organisations; managing change; business law; human resource management; and, social media.
