

Advanced Certificate: Access to Paramedic Science

Fife College

Venues

Dunfermline (Halbeath) Campus

Content

Thinking of becoming a paramedic and need to develop your skills in preparation of university study? This course will aid the development of your skills in communication and decision-making in a variety of situations. Whilst studying a range of subjects, we will provide a basis on which to build your healthcare knowledge.

Study will include human development and care values along with an opportunity to learn about the regulation of the health and social care sector, its history and challenges.

Employability skills, including interview and communication skills will also be developed.

Some of the units studied are:

Human Development and Behaviour; Physiology and Health; Pharmacology: An introduction; Values & Principles of Care; Understanding Mental Health Issues; Introduction to First Aid.
