

Electrical and Mechanical Engineering Systems (2nd year entry)

Glasgow Clyde College

Venues

Anniesland Campus

Content

During this exciting multi-disciplinary HND, you'll study core engineering concepts along with electrical and mechanical engineering, to give you the skills you need to become a flexible and creative engineer. If you complete this course successfully, you can go onto further study at university, do an engineering apprenticeship or use your knowledge in a large range of engineering roles in industries as diverse as telecommunications, manufacturing, aerospace and robotics.

You will complete a range of units such as:

Business awareness and continuing professional development; Principles of safe engineering systems; Design for manufacture; Engineering systems analysis: System modelling and control; Project management: Managing the implementation of a project; Engineering mathematics 2-4.

Start Date

August

Qualification

HND

Study Method

Full time

Course Length

1 year

Department

Engineering Systems

Entry Requirements

Relevant HNC.

SCQF Level

8
