Web and Mobile Design

Robert Gordon University

Content

Providing a unique approach to Web and Mobile Design, this course brings together Computing, Digital Marketing, and Visual Communication expertise from three schools across the University to prepare graduates with a creative, adaptable skillset for the modern web and mobile software industry .

This course is designed to give you the skills needed to leverage web and mobile technologies to solving real-world challenges. Focusing on modern software development techniques, students will learn app design and development for various platforms using industry-standard tools. Through collaboration with experts in computing, communication design, and digital marketing, you'll gain hands-on experience of working across subject areas, reflecting modern software development practices. You can also enhance your skills in areas like data science, artificial intelligence, cyber security, creative design, or games design to align with your preferred career path.
