Computing with Cyber Security (Level 6)

UHI Inverness

Venues

Inverness Campus

Content

With the increasing demand for workers to be skilled in cyber and digital technologies, this course provides you with a platform to develop your existing computing skills and be successful in the ever-growing sector. You will learn how to secure and fault find on computer systems and networks as well as gain knowledge in cyber security. You will also have the opportunity to develop your skills in programming using Javascript and working with databases using SQL (Structured Query Language).
