Content

Accounting and Finance professionals help organisations make informed decisions. They are integral to a business's overall success and stability, helping to foster long-term sustainability. They help the business adhere to financial regulations, and uphold standards. This creates social prosperity for both organisations and society.

This 3-year course covers various applied areas in accounting and finance. You will delve into subjects such as: financial and management accounting; taxation; audit; portfolio management; financial institutions.

BSc Accounting and Finance includes an optional fully funded 8-week internship. This allows you to gain invaluable practical experience, enhancing your CV and employability.
