

## Civil Engineering

City of Glasgow College

### Venues

City Campus

### Content

The HNC Civil Engineering programme delivered at City of Glasgow College is designed to give you an overview of the industry and covers a broad range of subjects.

From the subjects you complete as part of the HNC programme, you may then be eligible to progress into 2nd year of a Civil Engineering HND or related degree course (direct entry into 2nd year at some universities based on an A in the graded unit) after which you can choose what area within civil engineering you wish to specialise in, from a range of specialisms such as structures, environmental, and transportation to name a few. Choosing your own path means you can do the job you enjoy, but it also allows employers to mold you from a good grounding knowledge of Civil Engineering into an area that is in demand from industry.

### Start Date

August

### Qualification

HNC

### Study Method

Full time

### Course Length

1 year

### Department

Built Environment
