

Computing: Software Development (2nd year entry)

City of Glasgow College

Venues

City Campus

Content

According to the Technology Insights Report from e-skills UK, "Through to 2020 Software Professionals show the highest forecast employment growth of all IT & Telecoms occupations."

This hands-on course will allow you to study towards an up-to-date qualification, covering many of the skills that are in high demand for a range of different careers in the software development/programming sector of the computer industry. These include developing skills in C# and Java, Object Oriented Design, Object-Oriented Programming, SQL Programming, Big Data and Project Management.

Embedded within this award is an Oracle vendor qualification which may make you significantly more employable.

This stimulating, learner-focused programme will be delivered to you by our highly professional teaching staff with significant software development experience and a proven track record of bringing out the best in their students.

This course will help prepare you for either employment or progression to university in computing, a skill set that is currently in high demand.
