Content

Have you ever fancied finding out how hackers think - but for the right reasons? Or maybe you've wanted to design your own game, build a website, or get your head around how computers actually talk to each other?

This hands-on course gives you the chance to explore it all. You'll cover ethical hacking, computer networking, game design, and software/web programming, learning loads of practical and problem-solving skills along the way. By the end, you'll have a solid base to move on to further study or step into your first tech job.
