Certificate in Computing (Level 6)

Dundee and Angus College

Venues

Gardyne Campus

Content

Have you ever wanted to take your tech skills that bit further? Maybe you've already built a website, tried a bit of coding, or wondered how everything connects behind the scenes?

This course lets you dig deeper into the world of computing and digital technology. You'll work on practical, hands-on projects covering areas like networking, software and web development, game design, and cyber security. It's a great mix of real-world learning and creative problem-solving that helps you build confidence and prepare for the next step - whether that's further study or your first role in tech.
