

Built Environment (Level 6)

Edinburgh College

Venues

Granton Campus

Content

This course is designed to provide you with the knowledge, skills, and understanding needed to thrive in this dynamic sector. It covers essential aspects of construction, such as resource management, materials coordination, workforce planning, and monitoring construction quality and progress.

This course offers a pathway into the construction industry without the need for a traditional apprenticeship while also enhancing your chances of securing an apprenticeship if desired.

Content includes:

Construction technology; Modern methods of construction; Health and safety; Construction materials; Construction site surveying; and, Building environment project.
