Civil Engineering (Level 6)

Edinburgh College

Venues

Granton Campus

Content

This course is designed to provide you with the knowledge, skills, and understanding essential for success in this dynamic field. It covers critical aspects of construction, including resource organisation, materials coordination, workforce planning, and the management of construction quality and progress.

This course offers a pathway into the construction industry without requiring a traditional apprenticeship and increases your chances of securing an apprenticeship if you choose that route.

Content includes:

Construction technology; Modern methods of construction; Health and safety; Construction materials; Construction site surveying; and, Building environment project.
