

Introduction to Construction Design and Manufacture (Level 4)

West Lothian College

Content

This course is suited to those thinking about a career in construction. It is an ideal course for school leavers to develop various construction-based skills, with a focus on designing and manufacturing products and developing cross over skills that can be used throughout the construction industry.

It includes classroom and workshop-based activities and supports students on to further study or employment.

You will develop skills and knowledge in various disciplines within the construction industry, including practical skills in a workshop environment.
