Introduction to Building Insulation and Alternative Heating Source (Level 4)

West Lothian College

Content

The course provides an excellent introduction to a career in the trades for energy efficiency in homes, teaching you the practical skills needed to progress to further study in the area.

You will develop practical skills in the construction and plumbing workshop environment, and although most of the time will be spent on practical activities, you will also learn the principles in the classroom.

Units include:
Installing internal wall insulation; Installing external wall insulation; Alternative home heating systems; Energy efficiency measure ; Grey water reuse; Solar thermal energy.
