

Pathways to study Social Science (Level 5)

West Lothian College

Content

This course is designed to give learners the opportunity to gain introductory knowledge of the Social Sciences.

On this course, you will learn to think critically and analyse local, national and global topics, such as social and political issues, citizenship, sustainability, morality and mental health.

The course will give an introduction to Social Science subjects, such as RMPS, Mental Health, Modern Studies and Level 4 Numeracy. These will cover a range of interesting subjects, such as inequality, values and beliefs and social issues.??
