Computer Science with Artificial Intelligence

Open University in Scotland

Content

Gain the in-demand skills needed in a fast-moving digital world through our comprehensive computer science with artificial intelligence degree, designed using the latest industry insights and research. You'll go beyond computer science fundamentals and explore advanced AI topics that are rapidly shaping how we live, work and connect. Through practical projects, you'll become a computational problem solver, able to develop AI systems using machine learning and programming in Python. Whichever topics interest you most, we'll equip you with the skills for a career in a wide range of tech areas.

Start Date

October, February, April

Qualification

Degree

Study Method

Online learning

Award Title

BSc Hons

Course Length

Flexible

Faculty

General

Department

Computing and IT

Entry Requirements

There are no formal entry requirements to study this degree. Computer and internet access required.

If you're new to study or to the OU, it is recommended that you start with a course at Level 1.

SCQF Level

10

SCQF Points

«SCQFPoints»

Progression Routes

This degree will benefit you whether you already work with computing and AI solutions or aspire to enter the field. You'll gain a sound grasp of hardware, software, and systems-based technologies, preparing you for employment in software engineering, communications, and the AI industry. You'll develop transferable skills such as numeracy, problem-solving, teamwork, time management, employability, and sustainability awareness.
