Content

Looking to enhance your computing and digital media skills?

This brand-new course has been designed to build upon everything you've learnt on the Level 5 programme, with a particular focus on working to professional project briefs. It's been developed to prepare you for employment or further study at degree level.

You'll work collaboratively with your classmates and lecturers on a number of creative projects, such as website development, app creation, video production and computer game design. As you work on these projects, you will build a portfolio to showcase your own work. You'll get hands-on experience working with industry relevant software to further develop your content creation skills.

Join us and take your next step towards a successful career in Computing and Digital Media.

Start Date

August

Qualification

NC
