IT Software Development (Graduate Apprenticeship)

University of Dundee

Venues

City Campus

Content

The BSc (Hons) IT Software Development Graduate Apprenticeship course, will not only develop your own knowledge and understanding but also helps grow a business as well.

You will do this by:

Gaining experience in custom software development processes, including the knowledge, skills, and professional competencies necessary to a software engineer.

Designing appropriate solutions in a range of application contexts/domains using software development approaches.

Building and testing software solutions.

Reconciling conflicting project objectives and finding acceptable compromises.

Understanding current theories, models, and techniques that provide a basis for problem identification and analysis, software design, development, implementation, verification, and documentation.

Understanding the importance of applying negotiation, effective work habits, leadership, and good communication with stakeholders.
