Content

Psychology is the scientific study of the mind, brain, and behaviour. It focuses on building and testing theories to explain how people interact with each other and the world around them.

Year 1:

You will receive a general introduction to psychology in your first year, covering biological, social and developmental psychology, the psychology of memory and perception, individual differences and language and thinking. You will also learn about research methods and use statistics in psychology.

Year 2:

You will continue to study the core areas of psychology, along with neuropsychology, abnormal, and historical psychology, and you will develop your research skills by practising statistics and running practical experiments.

Year 3:

You will take an advanced tutorial course to help you critically analyse psychology research papers. You will take advanced courses in the core areas required for British Psychology Society accreditation (social, developmental, biological, cognitive and differential psychology) and carry out a literature review and a group research project in one of these core areas.

Year 4:

You will continue to choose advanced option courses in psychology based on your interests. These courses are research-led. They will teach you about cutting-edge topics from psychology sub-disciplines. You will carry out a research project in psychology and submit it as a dissertation.

Start Date

September

Qualification

Degree

Study Method

Full time

Award Title

BSc Hons

UCAS Code

C800

Course Length

4 years

Faculty

College of Arts, Humanities and Social Sciences
