

## 3D Design: Interior Architecture

City of Glasgow College

### Venues

City Campus

### Content

The course will develop design skills from the basis of a sketchbook, drawing, making and building. Understanding the fundamentals of ergonomics and building spaces to create positive experiences for the user. You will learn CAD and SketchUp, Adobe CC, and other software to support traditional techniques.

Alongside peers, you will be supported by a talented team of design staff specialising in interior architecture and design with varied backgrounds and industry skills, some of whom currently run design practices whilst teaching part-time.

You will undertake a variety of subjects, projects, live projects, collaborative work and class trips throughout your studies at City of Glasgow College, including:

Generating your work portfolio; The design process from research and concept to presentation; Sketch development; Technical and perspective drawing; Rendering; Model making; CAD; Working with a client; Commercial design; Exhibition design; Art & design lectures.
