

Certificate in Construction Technology (Level 6)

Dundee and Angus College

Venues

Kingsway Campus

Content

Construction Technology covers a broad range of construction-related disciplines including site surveying, construction, energy, thermal performance, water, acoustics, model making and human behaviour.

This course equips you with the knowledge and skills required for the specification, design and management of engineering services required in the built environment with an emphasis on sustainable solutions. Designed to give you the knowledge and skills needed by industry to design buildings of the future that not only provide sustainable and low energy-built environments that have a positive influence on the health and wellbeing of the people who use them, buildings that are also resilient and adaptable to future climate change.

Start Date

August

Qualification
