

Engineering Systems

Dundee and Angus College

Venues

Arbroath Campus

Content

The course is structured to align with the wide-ranging demands of the engineering industry. This HNC develops your practical knowledge of advanced mechanical and electrical systems, with hands-on experience using design, modelling, and simulation software. You will study a range of specialist units, such as Practical Workshop Skills, Computer-Aided Design, and Materials Selection.

These subjects are delivered at an advanced level, helping you build strong transferable skills that are vital for progression and long-term success in an engineering career.

Start Date

August

Qualification

HNC

Study Method

Full time

Course Length

1 year

Department

Engineering

Entry Requirements

Higher English and Maths (Applications of Maths not accepted) or Physics, or relevant national qualifications at SCQF Level 6.

SCQF Level

7
