

Sustainable Architectural Studies

University of the Highlands and Islands (UHI)

Venues

UHI Inverness

Content

Are you passionate about architecture and the technology that surrounds design in the built environment? If so, this innovative BSc (Hons) Sustainable Architectural Studies is the course for you.

Gain the theoretical and project-based skills required within a modern architectural practice, including an excellent understanding of managing projects from conception through to completion. Combine simulated design office practice, site visits and regular project work to ensure that you gain the skills demanded by the architectural industry, from building information modelling to technical design. Work with professionally qualified tutors to develop essential knowledge, understanding and proficiency that will make you highly employable as an architectural technologist.

Graduate with an excellent understanding of the design and technical process of projects, and the ability to enter industry as an effective contributor to an architectural practice from day one, as reflected in the positive feedback from the employer partners who regularly recruit from this programme.

Start Date

September
