Environmental Science

University of the Highlands and Islands (UHI)

Venues

UHI Inverness
Virtual Learning Environment (VLE)

Content

Are you passionate about understanding the processes that shape all aspects of our natural environment? Perhaps you've already spent time in the industry and now you're ready to focus your energies into a more specific area of the environmental sciences?

Explore your fascination with the world around us on our 4-year BSc (Hons) Environmental Science, with amazing opportunities to pursue your specific interests via our Environmental Biology and Environmental Science with Archaeology pathways.

You won’t find a better classroom in which to study than the Highlands and Islands of Scotland. With outstanding locations such as the newly inscribed Flow Country World Heritage Site (the first peatland World Heritage Site), Cairngorms National Park, and many more, we have, undeniably, one of the world’s best ‘living laboratories’, all set in the spectacular natural habitat of the Scottish Highlands.

Develop core scientific and analytical skills through your course work, with access to specialist and state-of-the-art laboratory facilities across the university network. During each year of study you will have the opportunity to choose modules with lab and field residentials at a variety of locations throughout the region, including an international field trip in year 2. These modules are a key part of the course, allowing you to develop your lab and field skills while working in some of the most outstanding habitats in Scotland and Iceland.

Start Date

September

Qualification

Degree

Study Method

Part time (day)

Award Title

BSc Hons

UCAS Code

F900

Course Length

8 years

Department

Science, Nature and the Environment

Entry Requirements
