Secondary Education with Biology

University of Aberdeen

Venues

Old Aberdeen Campus

Content

Spark a passion for STEM in the next generation of learners to help them discover a world of possibilities and develop essential skills to unlock their future careers. This programme offers a flexible pathway to transition from college to university and build solid grounding in your specialist subject to become a secondary teacher in biology.

In the first year (Year 3) of university learning, you will undertake 60 credits in Education alongside 60 credits in biology courses that would build on your prior learning and give you a strong grounding to take your knowledge into schools in the final year of the MA programme. The education courses studied in Year 3 give firm foundations about policy, and STEM education that can be built on in Year 4. You can tailor your educational journey to your interests and exit at the end of Year 3 if desired.

Year 4 follows the accredited PGDE Secondary programme which includes one Education course (60 credits) and one placement-based 60-credit course (18 weeks total in two different schools) teaching biology in secondary schools.

Start Date

September

Qualification

Degree

Study Method

Full time
