

## Biomedical Science Pathway (accredited by IBMS)

Glasgow Caledonian University

### Content

Pathways students enrol on the undergraduate BSc (Hons) Biomedical Science (GCU Pathways) at Glasgow Caledonian University. In the first year, you'll study HNC Applied Science at Glasgow Kelvin College while preparing for years 2, 3 and 4 (for Honours) of the degree at GCU.

Although you are a student enrolled on BSc (Hons) Biomedical Science (GCU Pathways) course at GCU, Year1 of the course will take place at Glasgow Kelvin College.

The first year will involve you working towards achieving an HNC in Applied Science and the subjects you study will underpin the teaching at Glasgow Caledonian University in Year 2, 3 and Year 4 of the degree, BSc (Hons) Biomedical Science.

Biomedical scientists carry out laboratory tests on specimens sent for analysis by GPs and other healthcare professionals. Biomedical Science is vital for the clinical diagnosis of disease and accurate treatment of patients and the operation of the NHS and other health-related industries.

You will gain the knowledge and skills needed to become a biomedical scientist, including cellular pathology, clinical biochemistry, haematology, and clinical microbiology. A key strength of the course is a work-based placement in a Scottish hospital by selection. International students are not eligible for consideration for placement.

### Start Date

September

### Qualification

Degree

### Study Method

Full time

### Award Title

BSc Hons

### UCAS Code

B941

### Course Length

4 years

## Faculty

School of Health and Life Sciences

## Department

Biological and Biomedical Sciences

## Entry Requirements

2027 entry requirements

2 Highers at BB plus 2 from Maths, Biology, Chemistry and Physics at National 5.

## SCQF Level

10

## Progression Routes

«ProgressionRoutes»

## Combination Courses

«htmlCombinationCourse»
