Animal Care and Zoology

University of the West of Scotland

Venues

Lanarkshire Campus

Content

This degree will give you a grounding in the biological sciences before progressing to more advanced topics in the animal care and zoological fields. You will also develop the skills and knowledge to run a business in the animal care sector.

There is a focus on practical work using modern techniques, fostering transferable skills and developing research and problem-solving abilities.

There is training from industry professionals will demonstrate how you can apply theoretical knowledge to practical situations.

An emphasis is placed on interactive learning and assessment, including case studies and technical skills development.

Work-based learning allows you to apply your knowledge in a real-world setting and develop the skills sought after by employers.
