

Geospatial and Mapping Sciences

University of Glasgow

Venues

Gilmorehill Campus

Content

This Masters in Geospatial & Mapping Sciences focuses on understanding the theory and practice of geospatial data collection, land and hydrographic surveying, data and information quality, applications of survey information, and research and development in the field of geomatics. It is strongly endorsed by industry, accredited by the RICS and has an excellent employment record.

You can exit after 9-32 months with PgCert Geospatial and Mapping Sciences.

You can exit after 21-44 months with PgDip Geospatial and Mapping Sciences.

Start Date

September

Qualification

Postgraduate Master's

Study Method

Part time (day)

Award Title

MSc

Course Length

24 - 48 months

Faculty

College of Science and Engineering

Department

Geographical and Earth Sciences

Entry Requirements

Normally an Honours degree in a relevant field such as civil engineering, earth or environmental science, geography, mathematics, physics, or planning, but others with some mathematical background will be considered. Those with a degree in geomatics or a closely related subject or who meet the age and experience criteria of the Royal Institution of Chartered Surveyors can use the programme as a route to a professional qualification or preparation for a research degree and may, under special circumstances, be given exemption from some aspects of the programme.
