

Civil Engineering and Management

University of Glasgow

Venues

Gilmorehill Campus

Content

The Masters in Civil Engineering and Management introduces you to contemporary business and management issues while increasing your depth of knowledge in your chosen civil engineering speciality.

You will gain first-hand experience of managing an engineering project through the integrated systems design project, allowing development of skills in project management, quality management and costing.

You will be able to apply management to engineering projects, allowing you to gain an advantage in today's competitive job market and advance to the most senior positions within an engineering organisation.
