

Environmental Protection and Management (in conjunction with Scotland's Rural College (SRUC))

University of Edinburgh

Venues

Central Campus

Content

Your chance to play a vital role to protect and conserve the environment starts here.

Our actions have had, and continue to have a significant impact on our planet. Human impacts such as the use of natural resources, deforestation, soil erosion, the release of pollutants and pathogens, invasive species, and the increase in greenhouse gases are all examples of pressures that have potentially severe consequences for humanity and other life on Earth.

The MSc Environmental Protection and Management will give you an in-depth understanding of natural resource management based on a scientific understanding of the issues, but also linked across disciplines.

It will equip you with advanced skills and knowledge about the processes that give rise to environmental degradation and pollution problems, and the strategies to affect sustainable change.

Start Date

September

Qualification

Postgraduate Master's

Study Method

Full time

Award Title

MSc

Course Length

1 year

Faculty

College of Science and Engineering

Department

Geosciences

Entry Requirements

A UK 2:1 honours degree, or its international.

A UK 2:2 honours degree, or its international equivalent, may also be considered with relevant industry experience.

SCQF Level

11

Address

Old College
South Bridge
Edinburgh
City of Edinburgh
EH8 9YL
