

Carbon Management

University of Edinburgh

Venues

Central Campus

Content

The MSc in Carbon Management is an interdisciplinary programme which focuses on the response to the challenge of climate change and decarbonising the economy. Drawing upon business studies, climate science, economics and the social sciences, it is delivered by the School of GeoSciences and the Business School at the University of Edinburgh.

The programme creates a culture of positivity in how we think about, and act towards, the climate change challenge. It is designed to equip you with high-level knowledge and understanding of climate change economics, carbon policy, managing decarbonisation and adaptation, business and corporate strategy as well as the science of climate change. You will also develop the skills and know-how in using analytical methods in carbon economics and policy making.

This programme is ideal for those who are passionate about climate change and want a career in which they become part of the solution to one of the world's most complex and greatest challenges.
