

# Physics with Meteorology

University of Edinburgh

## Venues

King's Buildings Campus

## Content

This degree programme is aimed at students who wish to study a physics degree with a significant amount of atmospheric physics. This programme combines the study of physics with an introduction to meteorology.

### Year 1

You will study compulsory courses in physics and mathematics. Physics 1A is innovative in its use of technology and offers an interactive learning experience. Physics 1B introduces you to the fundamentals of quantum physics.

You will study Mathematics for Physics 1 and 2 which include mathematical and problem solving skills in the context of algebra and calculus, with increasing emphasis on physical applications.

You will be able to choose two further subjects from other academic areas.

### Year 2

You will study modern physics and physics of fields and matter. Supporting mathematics courses will cover algebra, calculus, dynamics and vector calculus and you will be introduced to practical physics, including programming, data analysis and experimental techniques. You will also take meteorology courses in atmosphere & environment, and weather & climate.

Students entering the programme in Year 2 will take additional introductory courses in classical physics and mathematics.

### Year 3

You will study thermodynamics, statistical mechanics, electromagnetism, optics and quantum mechanics.

We offer a supporting mathematics course covering Fourier analysis, probability and statistics, a computing course on numerical algorithms, and an introductory course to research methods.

### Year 4

In this year there are a number of compulsory courses covering physics material including condensed matter physics and experimental techniques, as well meteorology material such as atmospheric dynamics and climate modelling. Students undertake project work and select a number of option courses.

## Start Date

September

## Qualification

Degree

## Study Method

Full time

## Award Title

BSc Hons

## UCAS Code

F304

## Course Length

4 years

## Faculty

College of Science and Engineering

## Department

Physics and Astronomy

## Entry Requirements

2026 entry requirements

Standard entry:

4 Highers at AAAA (by end of S5 preferred) including Maths and Physics plus English at National 5. Advanced Higher Maths is recommended.

Direct entry to year 2 is possible with 3 Advanced Highers at AAA including Maths and Physics plus the above.

Widening access entry:

4 Highers at AABBB (by end of S6) including Maths at A and Physics plus English at National 5. Advanced Higher Maths is recommended. Highers at BBB must be achieved in one sitting.

## SCQF Level

10
