Computing: Software Development

Dundee and Angus College

Venues

Gardyne Campus

Content

In Year 2, you'll take your software skills to the next level. Mastering object-orientated programming, mobile app development, and multiplatform web technologies. You'll explore how to design secure, efficient, and scalable systems that work across devices. With a focus on creativity, problem solving, and professional practice, this year prepares you for advanced study or entry into the software industry.

Your units will include

Object Orientated Design, programming, and software testing; Multiplatform web development; Mobile Technologies; Relational Database Management and Data Security.

Start Date

August

Qualification
