Cardonald Campus

Content

This course gives you an impressive skill set that will help you break into the film, TV or digital creative industries.

You'll learn about content development, production, the technical and post production stages of programme making, as well as how to work collaboratively with others. Across the academic year, you'll build your skills through a variety of exciting 'live' projects, including short form documentaries, films and music videos for academic purposes.

The college's strong industry links also mean you could get the chance to take part in site visits or work placements in professional production facilities.

Year 1:

You'll develop hands-on skills in production-led video projects, focused on single camera, location-based shooting. You'll be guided through each stage of the creative process, content creation, pre-production, production and post-production, enabling you to craft an impressive digital video portfolio to showcase your skills.

Year 2:

In the second year of the course, you will specialise in the creation of short films, following industry-standard practices used in drama production. You'll grow your portfolio by mastering the essentials of screenwriting, directing, and production management for drama. These creative areas are supported by advanced technical training in digital cinematography and editorial workflow.

Start Date

August

Qualification

HND

Study Method

Full time

Course Length

2 years

Department

TV

Entry Requirements

At least 1 Higher, English is preferred, or NQ Digital Film and Television (Level 5), or other relevant national qualifications at SCQF Level 5 or 6.
