

Art and Design

Glasgow Kelvin College

Venues

East End Campus

Content

This course will help you build on your existing skills and strengths to develop your own personal creative vision. You will learn from a broad base of art and design techniques in a range of media and materials. This will help your progress to a career in the Arts through successful articulation onto a diverse range of Higher Education degree programmes.

The course encourages experimentation and will equip you with a range of skills and techniques, a creative process and the vocabulary required at degree level. A critical component is the ability to develop ideas from conception to solution along with the capacity to verbalise and present concepts and work in a professional manner. Ongoing critiques, tutorials and reflective practice will help you to develop these skills.

You will also have the opportunity to develop skills in presenting your own and other artists' work through regular seminars and exhibitions in our gallery space. We aim to prepare you as fully as possible for life at degree level or employment. It is a fundamental principle that you develop your own style, can work independently and that your portfolio reflects this ability.
