

Photography: Analogue (Level 6)

Glasgow Kelvin College

Venues

Springburn Campus

Content

The ANALOGUE programme, a unique programme to Kelvin, offers a fantastic foundation and grounding in the principles of the camera, light and the creative process.

Analogue photography has experienced a huge revival recently with the reintroduction of film stocks, the launch of new cameras and the popularity of Lomo photography.

Film is so valuable, when you only have 36 shots loaded up in your camera, you need to slow down the process, consider your image and value when you are going to hit the shutter button. Developing a film takes time too, it's an art form and you, as the ANALOGUE photographer, are immersed in the whole process.

There's a wonderful satisfaction of loading a camera, shooting, unloading, developing the film, hanging it up to dry, cutting into strips of 6 and then making prints on the enlarger in the darkroom. It's a very tactile experience in this age of the cloud. This is a great starting point in your photography career with the opportunity to progress to a higher level of study and to go on to develop your digital photography technical skills too.

Start Date

August

Qualification

NQ

Study Method

Full time

Course Length

1 year

Department

Photography

Entry Requirements

No formal entry requirements. Portfolio of work required to be shown at interview.

SCQF Level

6

SCQF Points

«SCQFPoints»

Progression Routes

HNC/D level study
