Sound Production

Fife College

Venues

Glenrothes Campus

Content

This course caters to those interested in sound production careers, offering practical projects in audio engineering, music production, and sound design for various industries. Suitable for school leavers, adult returners, or freelancers seeking to enhance skills, it can lead to employment or further education upon completion.

You will study:
Microphone types and choosing and using them; Recording and mixing techniques, studio & location; Acoustic properties and soundwaves; Digital audio workstation set-up and use; Post production sound form film and games; Creative music re-mixing.

You will explore how sound supports other creative content, e.g. Sound Design, Game Sound, Film Sound, Television, Radio, Podcast and Vlog production. Whatever the medium consumed, it is always more accessible and engaging with well produced audio.

Start Date

August
