

Renewable Energy Development (RED)

Heriot-Watt University

Venues

Orkney Campus

Content

The MSc in Renewable Energy Development (RED) is delivered by the International Centre for Island Technology (ICIT) at our Orkney Campus. It has been designed around three key drivers of renewable energy development: policy and economics; technology; and the environment. The programme is designed to specifically address these key drivers of renewable energy development in the UK and abroad.

The RED programme aims to give its graduates cross-cutting skills in the renewables sector. The programme addresses the needs of renewable energy developers as they seek to maximise economic benefits whilst grappling with challenges of overcoming regulatory and environmental issues, and securing finance. Teaching is reinforced with project work where emphasis is placed on simulating real working situations.

You can exit at the end of 9 months with PgDip Renewable Energy Development (RED).

Start Date

September, January

Qualification

Postgraduate Master's

Study Method

Full time

Award Title

MSc

Course Length

12 months

Faculty

School of Energy, Geoscience, Infrastructure and Society
