

Civil Engineering

Heriot-Watt University

Venues

Edinburgh Campus

Content

MEng Civil Engineering covers materials, structures, geotechnics, water engineering, and transportation engineering, and will provide you with the key skills and knowledge required to become a professional civil engineer working in industry.

You'll concentrate on analysis and behaviours of materials in the early years of the degree, with a focus on design and management as you progress through your studies.

Your personal development within a professional environment will be supported and developed throughout your studies to ensure you gain the core technical skills and personal qualities required to thrive within the dynamic built environment industry at the highest possible technical level.
