Construction Project Management

Heriot-Watt University

Venues

Edinburgh Campus

Content

BSc (Hons) Construction Project Management will give you the knowledge and skills required to meet the needs of employers of the ever-thriving built environment sector.

You'll gain comprehensive understanding of the core principles related to construction project management, including management of resources, scheduling of work, construction and production processes, and be able to mitigate constraints due to various factors such as environmental, financial, contractual, and issues related to health and safety in construction projects.

You'll develop new ideas and learn about the briefing, planning, delivery, and procurement of built assets. You'll also gain an awareness of the various regulatory requirements and the relationships that exist between other disciplines associated with construction.

Start Date

September

Qualification

Degree

Study Method

Full time
