

18th Edition Electrical Regulations (City and Guilds)

Glasgow Clyde College

Venues

Cardonald Campus

Content

Following the increase of government investment in the infrastructure of electric vehicle charging, this course offers electricians the opportunity to learn how to install electrical vehicle charging points in compliance with BS 7671 and the new IET Code of Practice.

This course is suitable for practicing electricians interested in understanding how to install the range of equipment and systems available and includes exclusive guidance on electrical requirements. It will provide learners with the essential skills required to install electrical vehicle charging points in public, private and commercial locations including:

Design and installation; Inspection and testing; Commissioning and handover.

All the above is delivered in compliance with BS 7671 and the new IET Code of Practice. You will be assessed by an on-line multiple choice test and a practical assignment.

Cost includes training, exam fee and the IET Code Of Practice For Electric Vehicle Charging Equipment Installation (3rd Edition).
