Mechanical Maintenance (Level 5)

Glasgow Clyde College

Venues

Anniesland Campus

Content

If you enjoy finding out how things work, a career in mechanical maintenance could be for you.

During this course, you'll learn how to fix equipment when it breaks or maintain them to stop them from breaking in the first place!

You'll get an introduction to plant maintenance, installation and safety, and develop your skills and knowledge to progress in the world of engineering. If you're considering a career in engineering, and in particular mechanical engineering, then this course equips you to succeed.

Contents Include:
Communication core skill unit; Mathematics: Craft 1; Engineering: Applying information technology; Electrical plant safety and maintenance; Graphical engineering communication; Maintenance safety; Mechanical engineering principles; Plant installation; Pneumatics and hydraulics; Engineering dimensional control; CAD for engineers; Engineering materials; Graphical engineering communications.

Start Date

August

Qualification

NC

Study Method

Full time

Course Length

1 year

Department

Engineering

Entry Requirements

2 subjects at National 4 including Maths.

SCQF Level

5
